

IMPORTANT NOTE FOR OUR INJECTION PATIENTS

(Prior to your injections): This *reference sheet* NEEDS TO BE PLACED in an area where it can conveniently be referred to by you, before your procedure. This reference sheet will be your guide and help answer these common questions:

Pre-Sclerotherapy Patient

What to Do In Preparation for Sclerotherapy Injections

- DO NOT take any antibiotic with a name ending in "cycline" for 2 weeks prior to treatment.
- Discontinue taking Aspirin products, Motrin, Iron or Vitamin E supplements for 4 days PRIOR to treatment.
- Discontinue tanning and tanning creams 2 weeks prior to your injection session.
- DO NOT apply creams or lotion the day of the injection session.

What to Do the Day of the Injection Session

- Wear or bring a pair of shorts the day of your injection session.
- Bring your prescription compression stockings. They will be needed immediately following your injection session.

What Prevents Us from Treating You / Proceeding with Your Treatment

- Not bringing your prescription compression stockings.
- Presenting with a tan.

It is required that this service is paid at the time of scheduling. Any missed treatment appointment (or any cancelled appointment within 48 hours of appointment time) will not be refunded (where service is deemed only cosmetic in nature).
